PROFESSIONAL SUMMARY

Technical Support and Implementation Engineer with 1.3 years of experience at a product-based company. Skilled in L1/L2 application support, log analysis and troubleshooting using MS SQL Server, and debugging in C# and Python. Experienced in on-site product deployment, including MS SQL installation, configuration, IIS hosting and end-user training. Proven ability to resolve customer issues quickly, coordinate with development teams, and present monthly support metrics to management.

TECHNICAL SKILLS

Project Management: End-to-End Project Lifecycle · Client Sign-off · Cross-Functional Coordination · Customer Relationship Management · AMC Transition

Data & Reporting: SQL Server · SQL Queries · Power BI · Advanced Excel · Data Analysis · Python basics · Data Visualization · SAP Data Extraction

Programming & Databases: C# · Python · MS SQL Server · SQL Queries (SELECT, JOIN, UPDATE, TRUNCATE) · Database Backup & Restore · Log Analysis

Hosting & Deployment: IIS (Internet Information Services) · Website Hosting & Configuration · IIS Site & Application Setup · Deployment of Published Files · Web config Configuration · Local & Cloud Server Deployment · IIS Application Pool & Binding Configuration

EXPERIENCE

ECOSOFT ZOLUTIONS PVT LTD— Technical Support Engineer (L1 & L2)

Aug 2025-Sep 2026

- Provided L1 and L2 support for enterprise application customers, resolving issues reported via email and phone calls within SLA.
- Analyzed application logs and error records using MS SQL to identify root causes and deliver timely bug fixes.
- Debugged and resolved issues in Python code; identified C# code-level defects and escalated them to the development team with clear reproduction steps and follow-up until closure.
- Prepared and presented Monthly Review Meeting (MRM) reports in PowerPoint to the Managing Director, covering ticket volume (received, open, closed) and recommendations to reduce support load.

ECOSOFT ZOLUTIONS PVT LTD— Implementation Engineer

Aug 2025-Sep 2026

- Received project and product handovers from the development team and led on-site deployments at customer locations.
- Installed and configured MS SQL Server and application configuration files as per customer requirements.
- Hosted and deployed web applications on IIS.
- Conducted end-user training sessions to ensure smooth adoption of the product.
- Obtained Project Completion Certificates (COC) from customers, confirming successful project delivery and sign-off.

PROJECTS

Role Played: Application Support (L1/L2) · Troubleshooting & Debugging · Database Support (MS SQL) · Customer Coordination · Implementation & Deployment · IIS Hosting · End-User Training · Project Sign-off · Support Reporting (MRM)

1) YSI Private Limited: Sales Order Management System | (SOMS)

- Implemented and supported an end-to-end ERP solution covering PO order requests, finished goods management, invoice generation, and real-time stock management.
- Integrated the invoicing module with the Hyundai portal, so invoices are sent directly and accurately to the customer.

2) HSI Private Limited: ENSI 2.0 | (Enviro Signer)

- Developed and supported an e-invoicing application that takes customer input data, converts it into PDF invoices, and generates the IRN (Invoice Reference Number) through the government e-invoice portal.
- Automated the update of IRN details in the system, applied digital signatures (DS) to invoices, and interfaced the signed invoices to the Hyundai portal.

3) Ecosoft Zolutions Pvt Ltd: IT Support Ticket Analysis Dashboard | (Data Analysis)

Tools: Power BI · Excel · DAX

- Designed and developed an interactive Power BI dashboard analyzing 3,000+ IT support tickets across 4 years (2023-2026).
- Visualized key metrics such as Total Tickets, Support Tickets, DEV Tickets, and Open Tickets using KPI cards, bar, line, donut, and pie charts.
- Identified the EnSi product as the highest issue volume (1,293 tickets), enabling targeted support prioritization decisions.
- Analyzed support engineer performance and ticket load distribution to support resource planning.

4) SL Lumax (Pune) Private Limited: Sequence Management System | (SEQM)

- Developed and supported a Sequence Management System for a Hyundai supplier, receiving vehicle sequence data directly from Hyundai into SQL tables and analyzing it to calculate the exact part quantities required (e.g., 18 headlamps, 10 brake lights).
- Separated parts by sequence and organized them trolley-wise, using QR code scanning to verify each part as it is loaded.
- Triggered alerts to the team before the Hyundai lorry's arrival, ensuring correct parts were ready in the right sequence for on-time delivery.

CERTIFICATIONS

Master Programming in Data Analytics, FITA Academy | Python, SQL, Excel, Power BI

Python Core, Apollo Computer Institute | Python fundamentals, OOP, file handling

Python Programming 3.x, Simplilearn | Python programming, data structures, scripting

EDUCATION

The New College| Madras University, Chennai.
Bachelor Of Commerce (Score: 62.5%)

Oct 2021 – May 2024
